

## AQUATICS

# Fritz GUARD

Tap Water Conditioner

- Makes Tap Water Safe for Aquatic Life
- Removes Chlorine and Chloramine
- Detoxifies Heavy Metals
- Reduces Stress
- Promotes Slime Coat Production
- Provides Electrolytes
- Promotes Nitrification
- pH-Balanced

FritzGuard® is a safe and effective pH-buffered water conditioner that neutralizes toxic chlorine, chloramines and heavy metals found in tap water. FritzGuard® promotes healing and reduces fish stress with aloe vera and vitamin E and provides necessary electrolytes. Naturally secreted by mucous glands, the slime coat is a natural defense system that protects fish from disease, aids in osmoregulation and reduces stress caused by sudden changes in the environment. FritzGuard® provides a replacement slime coat to aid fish that have lost theirs or have been injured due to stress, poor water conditions and handling. FritzGuard® enhances biofiltration by producing a slime coat over the filter media, aiding in the attachment of beneficial bacteria, like those in FritzZyme® biological products.

### Dosage / Instructions:

Use 1 tsp (5 ml) per 10 U.S. gallons (38 L).

For best results, add FritzGuard® to tap water before adding water to aquarium.

For marine aquariums, turn off protein skimmer for 6 hours after adding FritzGuard® to reduce foaming if a concern.

For areas with very high chlorine levels, dosage can be safely increased or repeated up to 5x.

### Available Sizes / Item # / Treats

Size / Treats	Item #
4 oz / 240 gal	80255
8 oz / 480 gal	80259
16 oz / 960 gal	80256
1 gal / 7,680 gal	80247
5 gal / 38,400 gal	80258
