

BARLEY BALES

Natural Clarifier For Ponds & Water Gardens

- All-natural Pond Treatment
- Works Without Chemicals
- Keeps Water Clear
- Lasts Up To Six Months
- Use Continuously For Best Results
- Packaged In Mesh Netting

FritzPond Barley Straw Bundles are an all-natural, safe, effective and economical way to maintain a clear pond year-round. As the barley straw decomposes in the water, natural by-products are released, promoting a clear and healthy aquatic environment.

Fritz Pond Barley Extract is compatible with FritzZyme® biological products and all other Fritz Pond conditioners and clarifiers.

Dosage / Instructions:

Each bale treats up to 1,000 gallons.

Instructions: Set the bundle in an area of the pond with good water flow. The bundle can be tethered or tied to keep it in place. Do not weigh down the bundle to sink it to the bottom of the pond. While there may be an immediate improvement in pond clarity, it is more common to see results after 2 to 4 weeks. Replace each bundle every three months.
