Fritz RPM ELEMENTS LIQUID MAGNESIUM

Aquarium Supplement

- Easy-To-Use Formula
- Contains No Toxic Metals
- Highly Concentrated Liquid Magnesium

A proper magnesium level is critical for the health and vitality of many reef aquarium inhabitants. The biologically useful forms of magnesium used in Fritz RPM Liquid Magnesium are utilized in the growth and development of many corals, invertebrates and beneficial calcareous algae. Fritz RPM Liquid Magnesium is formulated using only the highest purity magnesium chloride and magnesium sulfate in a balanced ratio, helping the aquarist to maintain the correct ratio of chloride to sulfate ions found in natural seawater.

Guaranteed Analysis: Magnesium (min) 70,000 ppm

Dosage / Instructions:

Shake well before using. Measure magnesium concentration in the aquarium, and determine the amount by which you wish to increase magnesium.

Each ml of Fritz RPM Magnesium will increase the concentration of magnesium in 1 US gallon (3.78 L) of water by 18 ppm. One teaspoon (5 ml) will raise 10 US gallons by 9 ppm. To reach the desired magnesium level between 1280 and 1400 ppm, add this product at a daily rate of 10 ml per 10 US gallons daily until the desired concentration is attained, then dose daily or weekly as needed.

Notes on Use: Do not dose more than 5 ml per 1 gallon per day. Test magnesium levels regularly.

Available Sizes / Item # / Treats

Size / Treats	Item #
16 oz / var	80310
32 oz / var	80311
1 gal / var	80313
5 gal / var	80314

Note: If magnesium levels are too low, the addition of calcium and alkalinity supplements will simply result in the chemical precipitation of calcium carbonate. Adjust the magnesium concentration first with Fritz RPM Liquid Magnesium before adjusting calcium and alkalinity.
