- Keeps aquariums clean, clear and polished for months

Available Sizes / Item

Size / Treats	Item #
MaxOut - Up to 75 gal	58803
Pro - Up to 100 gal	58804
Pro FW - Up to 100 gal	58808
FuzzOut - Up to 75 gal	58805

MAXOUT removes all toxins, metals and odors in the water column. High capacity carbon removes organics and polishes aquarium water. Proprietary resins unique to the MAXOUT blend aid in the removal of phosphates and reduces the buildup of organics that can cause algae. MAXOUT helps maintain aquarium pH levels by keeping them stable and consistent. Let MAXOUT clear your water and help balance your parameters.

Directions/Dosage

Simply place one mesh filter bag within a high flow area of your filtration system per 75 gallons (284 L) of water volume. No pre-rinsing is required. Fritz MAXOUT is compatible with both canister filters and standard sumps. For maximum effectiveness, replace every 30 - 60 days. Can be used in both fresh and saltwater aquariums of all sizes.
