Fritz PraziCleanse

Parasitic Disease Treatment

- Effective Against Internal and External Parasitic Infections
- Use for Tapeworms, Flatworms, Fish Lice, or Gill & Skin Flukes
- Safe for Fresh and Saltwater Systems

PraziCleanse is a safe and effective anti-parasitic treatment to control unwanted parasites. Effective against skin and gill flukes, tapeworms, flatworms, and turbellarians. This treatment is suitable for fresh and saltwater aquariums, and will not discolor the water. It does not harm plants, other invertebrates or uninfected fish. Do not use in systems with tube worms or feather dusters.

Dosage / Instructions:

Use one packet of PraziCleanse per 20 gallons (76 L). Repeat treatment after 5 days, after a 25% water change.

Use of a hospital tank is recommended. No water changes, pH or temperature adjustments necessary if readings are in ideal range. Remove all chemical filtration (carbon, ion exchange resins) during use. Turn off UV sterilizer if present during treatment. Aeration and water flow should be maintained. In marine aquariums turn off protein skimmer during treatment. Chemical ammonia removers such as Fritz Aquatics A.C.C.R. may be used during treatment to prevent ammonia poisoning of the fish. Note: Fritz PraziCleanse will not color or cloud aquarium water.

ACTIVE INGREDIENT: Each packet contains 190 mg praziquantel

WARNING, This product contains chemicals, including metronidazole, which is known to the State of California to cause cancer
